

Join the *Microporous and Mesoporous Materials* Early Career Council Board

Microporous and Mesoporous Materials (MICMAT) is now accepting entries to join the new Early Career Council Board (ECCB). Early career researchers are defined as being 40 years of age or younger (a correction can be made for time off research) and having completed their doctorate within the last 10 years, with publications within the scope of the journal. A term for ECCB members is three years, with possible renewal for a second term (if eligibility continues to be met). Exceptional ECCB members can be elevated to a **MICMAT Council Board member** status. They can also be promoted and recommended for similar capacities to other Elsevier journals.

The responsibilities of ECCB members include:

- Attend, whenever possible, the editorial council meetings
- Submit at least two articles to the journal, and actively participate in the organization of Special Issues by suggesting topics, volunteering to be a guest editor, and acting as a reviewer when invited
- Be an ambassador of MICMAT and promote the journal via social media, conferences, and other channels
- Provide consultation to MICMAT editors at their request

To apply:

Qualified early career researchers are encouraged to submit a 'nomination package' via email to **Leorah Stewart** (l.stewart2@elsevier.com), including **1)** a complete nomination form, **2)** a statement of up to two pages describing the nominee's accomplishments and impact in the field of Microporous and Mesoporous Materials, **3)** a full curriculum vitae, including date of birth, list of publications, and funding, **4)** names of two referees we could approach for letters of support (please seek their approval first).

Applications will only be accepted until **September 15, 2024**

Decisions will be made by the Editors on October 15, 2024. The selected ECBB member will be contacted via email and their names will be posted on MICMAT's homepage along with the Editorial Council.
